Professional Profile

Bachelor's degree holder in Computer Science, specialized in Software Engineering. Passionate about creating innovative digital solutions, with experience in web, mobile, AI, and data development. Autonomous, curious, motivated, and eager to contribute to real-world software projects.

Technical Skills

Web Development : HTML, CSS, JavaScript, Angular, React, PHP, Bootstrap, Node.js, Spring Boot, Firebase, Oracle, MongoDB.

Mobile Development : Flutter.

Programming : Java, Python, C.

Systems & Networks : Linux, Docker, Node-RED, Cisco (Routing/Switching), Wireshark (Network Analysis).

Data Science & ML : NumPy, Pandas, Matplotlib, image processing, Machine Learning , Deep learning.

Tools & Methodologies : Git, MySQL, VS Code, Spyder, Google Colab, StarUML, Scrum, Software Testing (ISTQB).

Professional Experience

2026 – VERMEG, Tunis — End-of-Studies Internship (Full Stack / AI)

Responsibilities and achievements :

- Developed an intelligent banking document processing platform for credit subscription workflows.
- Integrated AI models for automatic CIN and passport detection/classification.
- Built responsive web interfaces, dashboards, and REST API integrations.
- Prepared datasets, applied image preprocessing, and evaluated model performance.
- Participated in UML modeling, documentation, Git collaboration, and Scrum ceremonies.

2025 – TEASER DIGITAL, Tunis — Web Developer (React.js)

Responsibilities and achievements :

- Developed responsive e-commerce interfaces using React.js.

- Built reusable components using Hooks and Context API.
- Integrated REST APIs for authentication, products, cart, and orders.
- Participated in Scrum sprints, code reviews, testing, and debugging.
- Used Git for branch management, pull requests, and collaboration.

Academic Projects

Online Doctor Appointment — Angular & PHP

- Developed a platform for doctors, patients, appointments, and authentication.
- Built a responsive Angular frontend and PHP/MySQL backend.
- Created dashboards, booking, cancellation, and UML documentation.

Video Indexing — Python & OpenCV

- Automatic extraction of video frames using OpenCV.
- Scene change detection through histogram analysis.
- Generation of metadata for intelligent navigation.
- Implementation of an image analysis pipeline (preprocessing, segmentation).
- Production of a scientific report and project presentation.

Smart Road Monitoring (Computer Vision)

- **Multi-task pipeline design** : Architecture built around three specialized models working together.
- **Detection and Recognition** : Training models for vehicle localization and license plate identification.
- **Behavioral Analysis** : Monitoring driver state (fatigue, distraction, inattention detection).
- **Technical stack** : Python, OpenCV, YOLOv8 (Deep Learning).
- **Key skills** : Dataset preparation, object detection model training, real-time video stream processing.

Education

2024 – 2026 : Bachelor's Degree in Computer Science, ISTIC Borj Cedreya

2023 – 2024 : Bachelor's Degree in Computer Science, ISAMM Manouba

2022 – 2023 : Computer Science Baccalaureate — Honors (Good)

Languages

Arabic : C2

French : B2 (TCF)

English : C2 (EFSET)

Interests

Technology, AI, Web/Mobile Development, Data Science.
